

CELLULAR REGENERATION

There is only so much we can do regarding physical healing. In science the process of cellular regeneration is highly complex and experimental. We typically remove the energies restricting healing and fix the spiritual distress and invite in compounds and then trust in God to do the rest or trust in the body to heal itself as it was designed to do. But what do we do if the body is not healing itself? Here are a few steps to help you:

1. Is it God's will for healing to occur?
 - a. Is it 100% within God's will during your mortal lifetime for complete healing to occur?
 - i. If not, what percentage is within God's will?
 - ii. Note: There are some ailments that are intended to be part of our experience to learn from during our lifetime. These ailments may have contributing factors, such as negative energies, that cause the ailment to be worse. Contributing factors can likely be removed. For example, if a person has Down syndrome, there may be additional factors that intensify unnecessary suffering. While the Down syndrome will remain, the causes for the additional suffering can be removed.
 - b. What does God desire regarding your health?
 - i. Pray, get quiet and listen for an answer
 - c. Is there a lesson to learn that you have yet to learn?

2. Is the spirit in distress?
 - a. Why?
 - b. Is your spirit restricted from returning? Or is your spirit in more than 1 piece?
 - i. Correct these issues: could be control energy, could be self-destructive tools, could be a need for a spirit rescue (a spirit rescue is taught one-on-one and requires a teacher to complete) Look for all reasons why the spirit is in distress and correct each one.

He gave you this vessel to carry you through life to complete your mission. He knows how your body was formed and He knows what it needs to function properly. God knows how to heal your body. Have you asked Him to teach you how to heal it? Ask what additional steps you need to take to act in faith to receive the healing. Be patient, this may take time for you to understand the answers to your prayers.
 - b. Do I have dominion over my body part? (organ, limb, spine, blood, tissue, etc.) If you do not have dominion over the body part, then seek to understand what you can do to regain control.
 - i. Are there any energies preventing you from having dominion over your intelligences. Review the energies section if needed.
 - ii. Also consider the names upon the intelligences of each atom within your body. If your intelligences do not have your name and Christ’s name upon them:
 1. Review the control energies and invite all of the light energies into you.
 2. Focus on bathing in the living waters and washing the improper names off. Then invite the name of Christ to be placed upon the intelligences and place your own name upon them.
 - c. In the name of Jesus Christ command all corruption to depart from every cell.
 - d. You have dominion over your body. You can command your body to heal if it is done in a respectful manner. Additionally, you need to recognize how to care for the body to prevent the ailment from happening again. If you care for it properly, and you have learned your lesson(s), then you can command that the healing take place.
 - i. Command all cells to reform and regenerate back to their original creation by God the Father.
 1. This must be done with respect and pure love to be successful. Take your time on this step and allow your spirit to guide.
 2. Watch this take place and take a significant amount of time on this one step. Express sincere gratitude for the gift of healing. Visualize the healing taking place. Accept it with faith.
